COMMITTED TO KEEPING OUR NATION SAFE

For more than 70 years, RS&H has supported landmark projects that protect, train, and serve our military personnel and their families. From hangars and airfields to training and command facilities, we understand the unique architectural and engineering requirements of defense projects. Our specialized teams seek innovative approaches while meeting all federal and Department of Defense criteria for planning and design.

Since the onset of World War II, we've continuously provided cutting-edge solutions for United States defense installations worldwide. Whether new construction, renovations, planning, or programming, we assist the Department of Defense and its contractors with enhanced security, operational efficiency, and quality of service with a focus on achieving sustainability and energy conservation goals. Our experience includes traditional design, design-build, and construction services.

As the national security landscape evolves, we're proud to support our uniformed men and women that protect and lead our nation.

TAKING DEFENSE TO THE SKIES

Our teams have provided Federal Title I and Title II services for airfields, hangars, and related support facilities on military installations across the globe. Understanding the most important function of airfields and hangars is the ability to maximize an aircraft's capabilities, we offer innovative solutions coupled with expert knowledge in applying Department of Defense criteria. Our experience ranges from simple shade structures that protect an aircraft from the elements to more complicated, environmentally controlled maintenance facilities, as well as airfield paving and lighting.

STRENGTH IN BUILDINGS & INFRASTRUCTURE

As our military moves to a lighter, faster, and more intelligent force, we've built a reputation for modernizing military facilities into safer, more secure, and more sustainable spaces. Our designs for administrative, training, operations, headquarters, and mission and community support facilities enable seamless day-to-day operations while incorporating the latest advances in technology and sustainability. We're also leading the design of 21st Century Schools, creating innovative and collaborative learning environments for the children of our forces.

CAPITALIZING ON A FORCE MULTIPLIER

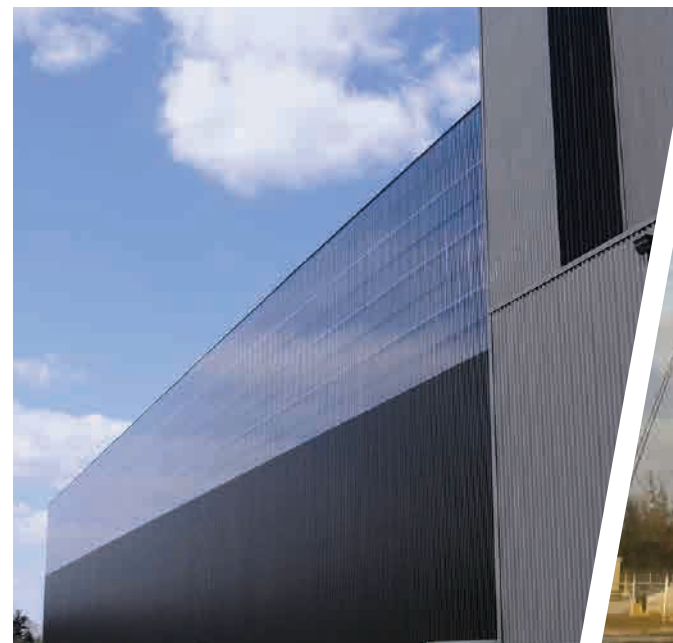

RS&H is the one sustainability and facility management consultant that provides the Department of Defense with the capacity to align operational practices with strategic vision. Our proven, award-winning approach to energy conservation and waste management has been used at Department of Defense facilities in the United States and 14 other countries to divert more than 900 million pounds of waste from landfills, conserve more than 900 million gallons of water, and save more than 3 million megawatt hours of electricity.

We help our clients plan, implement, and track organization-wide sustainability programs to achieve a return on investment. And we use adaptive leadership and continual funding mechanisms to motivate and empower the workforce for ensuring the long-term vitality of such initiatives.

BROAD SPECTRUM OF TECHNICAL EXPERTISE IN:

- » Energy Conservation
- » Green Design (e.g., High-Performance Buildings)
- » Fleet Management
- » Renewable Energy
- » Waste Minimization
- » Greenhouse Gas Management
- » Adaptation
- » Green Procurement
- » Electronic Stewardship
- » Education & Outreach
